<b>Class:</b>	BE
<b>No. of Participants (Students):</b>	24
<b>Organizer:</b>	IETE ISF

With full enthusiasm on the occasion of Engineers Day, a guest lecture is organized under the banner of IETE Student Forum, Sinhgad College of Engineering, Korti, Pandharpur on 15<sup>th</sup> September, 2017. The function was presided over by Prof. A. O. Mulani.

The function was started with felicitation of the industrial expert Mr. Abhilash Pimpalnerkar, Technical Support Engineer, Blancco Diagnostics, Pune. He started with the todays scenario of getting job. He insists the students to work hard, acquire as much knowledge as they can, prepare for aptitude, be with the todays need of industry. The session was very interactive and energetic. Students responded to the program to a great extent.

He said that telecom jobs are popular nowadays. People love telecommunication jobs because they represent the high tech world we live in. This is a huge and growing industry. The Indian Telecom industry is amongst the fastest growing industries in the world. Looking at the growth chart of the industry it can be stated that the present progress is very encouraging. With so many new players entering the market and existent players expanding their operations, the telecom revolution in India has been quite exceptional. Around 300 million population of highly consumable middle-class status that is advantageous for the industry surrounds the telecom sector in India. This is because most of the Indian who possess land line telephones can be substituted by mobile phones that are very unlike the developed countries. Therefore, it adds up to the growth in mobile sector in Indian telecom industry and it is one of the leading contributors to India's flourishing economy.

Ms. Rutuja Malwadkar, student member of ISF expressed her views about the program.

The function was concluded with vote of thanks by Mr. Ravikiran Takle and lot of promises and hope for future.
