HACKATHON 2K22

In “**Hackathon2k22**”, participants discuss ideas and form teams based on interests and specific skills, and some participants already have a clear definition of the project. Then the main event and teamwork begins, which lasts from **24 hours** to several days. As a rule, no one leaves the “**Hackathon2k22**” from start to finish. Teams work continuously and spend a minimum amount of time sleeping and eating. After the work is done, the teams present their product. A jury is always invited to hackathons, who evaluate projects and choose the winners.

The hackathons is a team competition for developers where participants gather in teams of **3-5 people** to create an app or hardware project without sleep over the weekend, and event sponsors provide them with coffee, food, and a place to work and play. It is the space where you can find innovative and creative ideas. You will be astonished by witnessing the blooming concepts of young minds. Every topic the participants handle will be unique and you will be carried away by their technical knowledge in creating complex solutions effortlessly. A Hackathon is the right place for the birth of creative ideas.

Problem Statement Evaluation By Mr. S. V. Pingale & Mr. N. M. Sawant
