

ONE PAGE REPORT
“VIRTUAL CAMPUS”

Arranged by ETELSA on Saturday, 22/09/2018

Industry Interaction should continue to remain the sole responsibility of the Institution. In other words each Institution will continue to be responsible and accountable for the Placement of its students, for which they will perform all activities including liaison with Corporate and Companies, Accreditation of their Institutions with Corporate and Companies, etc. Placement is the sole responsibility of Students. The Training and Placement cell (T&P) and various other Faculty members only facilitate and provide the guidance to the students.

The event “**Virtual Campus**” was organized by ETELSA under the department of Electronics and Telecommunication Engineering on **22nd September 2018 (Saturday)**. The event starts with Aptitude test, shortlisted students from which appeared for the Group Discussion. The qualified students from the group discussion then face the technical and Personal Interviews.

Although the event was postponed due to the placement companies for final year students , still there was huge response for the event where almost 100 students from different colleges from the nearby area took part in the event. The Interviewers for the event were Mr. Mahadev Nhavkar and Mrs. S. Uppalli having their own professional training centres, who gave suggestions and remarks to the candidates for their improvement. Their presence for the event throughout the day really helped the students to prepare for placement in actual.

At the end of day, prize distribution ceremony took place in the presence of Hon. Principal, Head of Department, All judges, and teaching staff members. The efforts taken by all including teaching, non-teaching staff members, ETELSA student coordinators and others were appreciated by the Hon. Principal and training and placement Officer.

Ms. Sonia navale from TE (E&TC) expressed vote of thanks.
