Report of one day workshop on “Computer fundamentals and Basics” Held at Nagarpalika Prathamika Shala No. 6, Pandharpur on 03.02.2018

Based on the interest of the students in school and particularly in computers, a one day workshop on “Computer fundamentals and Basics” was organized at Nagarpalika Prathamika Shala No. 6, Pandharpur on 23rd February 2018. The main goal of this workshop is to provide a fun opportunity for students to broaden their knowledge of computer softwares and to interact with other students who have a shared interest in the same. There are several reasons why the workshop of this sort is important. It can...

- Allow students to cultivate interest in computer, without the pressure of being graded.
- Reinforce the relevance of computers to students' everyday lives.
- Introduce students to the possibility of future study or employment in computer.
- Offer students the opportunity to serve their community.
- expand students' leadership skills by conducting demonstrations

The ETELSA students association of Electronics and Telecommunication Engineering department has organized the workshop keeping above in mind. The students from overall college took part and interestingly taught computer fundamentals and basics to students. There were almost 50 students of school who participate in the workshop. There was very nice response from the school and students demand for some more workshops like this. The student coordinator Mr. Ravikiran Takle of BE (E&TC) took special efforts. 11 students from various departments of our college beautifully explained them computer fundamentals and basics.

The student representative Ms. Udgave Deepali expressed vote of thanks to all.

Thank you,
