## A Webinar on “Performance of Frame Composite Shear Wall System.”

In the mid of this pandemic situation due to COVID-19, in continuation of knowledge gaining process for our students, the Department of Civil Engineering is organising many online Webinars/FDP's, etc. As a part of the same, on 20th April 2021 a webinar on topic “Performance of Frame Composite Shear Wall System” Was organised and the Resource person for this webinar was Dr. Punashri P. Phadnis, who is currently working as Asst. Professor at Department of Technology, Shivaji University, Kolhapur. This webinar was presided by Dr. S. S. Kadam, Head, Department of Civil Engineering. The purpose of this webinar was

to give idea about Performance of Frame Composite Shear Wall System and advancements in this area to the M. Tech & Final year UG students. They would get benefited to understand the various terms, methodologies adopted in analysis of shear walls specifically in high rise structures from expert's personal experiences. The function was started with introduction and virtual felicitation of Speaker and Guest Dr. Punashri P. Phadnis by Dr. S. S. Kadam in presence of Prof. G. D. Lakade (Webinar Coordinator). Followed by this Dr. Punashri P. Phadnis madam shared her views and experiences about Performance of Frame Composite Shear Wall System with a

very detailed PowerPoint presentation & with the help of 2 case studies. She also appreciated the organizing committee for their keen involvement in such a most excellent program. She also emphasized on benefits of student's participation in such events. The function was concluded with vote of thanks by Prof. G. D. Lakade. Lot of efforts were taken by all faculty members and students for successful accomplishment of this program.

The screenshot displays a Google Meet session. The main window shows a presentation slide titled "Introduction... RC Structural Walls". The slide content includes a bullet point: "Contribution to lateral force resisting system" with sub-points: "Large lateral stiffness", "Large lateral strength", and "Ductility". Below the text are two diagrams: one of an "RC Shear Wall Building" showing a cross-section with a central wall and columns, and another of an "RC Frame Building" showing a grid of columns and beams. A graph between the diagrams plots "Strength" on the y-axis and "Deformability" on the x-axis, showing two curves. The meeting interface at the bottom shows 16 participants in a grid, with "Smt. P.P. Phadnis" as the presenter. The time is 4:09 PM on 20-04-2021.
