

Experiential learning platform through Industrial Visits:

Industrial visit expose students to the real working environment, including workstations, plants, assembly lines, machinery, and systems, as well as interactions with highly qualified and experienced professionals. Students should gain a variety of skills that will benefit their development as well as their future career.

Objective:

- To introduce students to the practical working environment in their respective courses.
- To give students a chance to connect with industrial specialists and obtain a thorough understanding of industrial practices.

Figure 5.7.1 and table 5.71 represents different industrial visits carried out course coordinators.

Table 5.7.1: Number of students benefited through different industrial visits

Particulars	CAY (2023-24)	CAYm1 (2022-23)	CAYm2 (2021-22)	Relevance to PO and PSO	Assessment	Impact/ Outcome
Number of Students participated in Industrial Visit	133	205	83	PO1, PO6, PO7, PO12, PSO1	Report Writing	Student understand actual working in the industries and also, enriched with course knowledge
Number of Industries Visited	2	4	1
